

Congratulations to Dr. Xinmin Li and Clinical Microarray Core (CMC) in finishing the 10th NGS workshop. Special thanks to our outstanding panel of lecturers/instructors lead by Drs. Wayne Grody, Josh Deignan, Samuel Strom, Samuel, Ling Dong, Janice Yoshizawa, Vanina Tomasian, Xiangming Ding, Fake (Frank) Li, and Jamie Zhou! The workshop has triggered an extensive interest in both UCLA and non-UCLA research/clinical communities and received a large number of applicants. Due to space constrain, only 24 early registrants were accommodated, representing 11 different Universities/Hospitals/ Companies. The NGS workshop is consisted of a combination of lectures, wetlabs, and data analysis/interpretation. Due to the high demand, CMC has started hosting genomics workshop at least once a year since 2008 and it has been a huge success every year. 100% of the participants in our post-workshop survey ranked our workshop as Outstanding/Excellent!
